Projects

Creating a Bot Using Azure

12.2021 - 05.2022

In this project, we have worked on the creation of an AI-based bot i.e, CHATBOT it's something that makes the discussion parcel a lot more straightforward that even don't need additional support or human asset. It even provides guidance to one discussion and helps to track down a need. It extraordinarily relies upon the QNA we are providing for the machine. In this project, we have made a Chatbot utilizing sky blue assistance and making an information base. It not only saves money but also increases sales. Even provides multiple services in different scenarios like life-saving health messaging, CORTANA its personal assistance, cloud SQL database, function app, and many more. Be that as it may, the precarious expectation to absorb information to comprehend the exceptional design of the cloud stages overall and constantly changing Azure APIs explicitly, make it hard for application engineers to compose cloud-based applications.

Certificates

Salesforce Certified Administrator

Credential ID: 2592494

Certification Verification: sforce.co/verifycerts
September 25, 2022

Python Developer

ISO Certificate no: QMS/022101/0521

Date: 05 Dec 2021 - 05 May 2022
